Helping Hurt Children Heal

Children are impacted academically, emotionally, socially, and neurologically by pre and post-birth stress, trauma, neglect and abuse. Traumatized children present with an array of behaviors and can carry diagnoses like ADHD, Oppositional Defiant Disorder, Pervasive Developmental Disorder, Bipolar Disorder, depression, PTSD, etc. They may even have undiagnosed sensory processing problems which further hinder their ability to self-calm and be in constructive relationships with themselves and others. Learn how to better understand traumatized children from one who not only survived her own experience of childhood trauma and abuse but who is also thriving and teaching others how to overcome the "hard place" that they came from.

5. This pro-bono lecture is offered to referring organizations in the Houston Metropolitan area. Mileage within a 20-minute drive from Conroe is paid for by In-Family Services. Mileage beyond these points in the Houston Metropolitan area would be paid for by the contractor at the reimbursement standard of \$.56 a mile.
